Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/736,432

Applicant(s)

DEMIR ET AL.

Examiner

Duc M. Nguyen

Art Unit

2618

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5, 7-14, 16-23 and 25-31 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7-14, 16-23, 25-31 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

This action is in response to applicant's response filed on 10/12/04. Claims 1-5, 7-14, 16-23, 25-31 are now pending in the present application.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5, 10-14, 28 are rejected under 35 U.S.C. 102(e) as being anticipated by **Kurihara** (US Pat. Number 6,721,370).

Regarding claims 1, 10, **Kurihara** discloses a communication system (see Fig. 3), comprising:

- an automatic gain control (AGC) circuit which receives and adjusts the gain of a communication signal, the AGC being controlled by a gain control signal (see Fig. 3, refs. 15, 11); and

- an insertion phase variation compensation module (see ref. 14 in Fig. 3, phase correction unit) which continuously counteracts the effects of phase offsets introduced into the communication signal by the AGC circuit, based on the gain control signal (see c col. 3, lines 23-30 and ol. 3, line 47 – col. 4, line 25).

- a look up table (see Fig. 1A regarding table 2a) in communication with the

modem (baseband processor 31 in Fig. 3) and the insertion phase variation compensation module (refs. 14, 24 in Fig. 3), wherein the LUT receives the gain control signal from the modem and provides estimates of the phase offsets to the insertion phase variation compensation module as a function of the gain control signal (see col. 3, lines 23-30 and col. 3, line 47 - col. 4, line 25).

Regarding claim **28**, the claim is rejected for the same reason as set forth in claim 1 above, wherein it is clear that **Kurihara** would disclose steps (a) through (e) as claimed (see col. 3, line 47 – col. 4, line 25).

Regarding claims **2-5, 11-14**, **Kurihara** would teach an analog-to-digital converter ADC, phase variation module and a processor as claimed (see Fig. 3 regarding refs. 13, 14, 31, 15), noting that the combination of the baseband processor 31 and gain controller 15 would function in the similar way as of the claimed “modem”.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims **19-23** are rejected under 35 U.S.C. 103(a) as being unpatentable by **Kurihara**.

Regarding claims **19-23**, the claims are rejected for the same reason as set forth

in claims 2-5 above. In addition, since the use of an IC circuit for a CDMA communication device as disclosed by **Kurihara** is well known in the art, it would have been obvious to one skilled in the art to modify Kurihara to provide the IC circuit as claimed, for utilizing advantages of IC circuits such as cost, light weight.

5. Claims **7-9, 16-18, 25-27, 29-31** are rejected under 35 U.S.C. 103(a) as being unpatentable by **Kurihara** in view of **Hiramatsu et al** (US Patent Number **5,933,112**).

Regarding claims **7-9, Kurihara** would teach all the claimed limitations, see claims 1, 19 above, except for provided estimates include a Sin function and a Cos function of a phase offset, x . However, in an analogous art, **Hiramatsu** teaches a phase offset correction wherein estimation of compensation errors include a Sin function and a Cos function of a phase offset (see Figs. 2, 13 and col. 8, line 46 – col. 9, line 50 noting for exponential function $e^{j\theta} = \cos \theta + j \sin \theta$). Therefore, it would have been obvious to one skilled in the art of phase offset correction modules to modify Kurihara to include a Sin function and a Cos function of a phase offset to account for AFC processing errors, for further improving the performance of the receiver.

Regarding claims **16-18, 25-27, 29-31**, the claims are rejected for the same reason as set forth in claims 7-9 above.

6. Claims **7-9, 16-18, 25-27, 29-31** are rejected under 35 U.S.C. 103(a) as being unpatentable by **Kurihara** in view of **Nara et al** (US Patent Number **6,340,833**).

Regarding claims **7-9, Kurihara** would teach all the claimed limitations, see claims 1, 19 above, except for provided estimates include a Sin function and a Cos

Art Unit: 2618

function of a phase offset, x . However, it is noted that the estimation of compensation errors that include a Sin function and a Cos function of a phase offset is well known in the art as disclosed by **Nara** (see col. 6, lines 16-28). Therefore, it would have been obvious to one skilled in the art of phase offset correction modules to modify Kurihara to include a Sin function and a Cos function of a phase offset as claimed, in order to provide the estimation more accurately.

Regarding claims **16-18, 25-27, 29-31**, the claims are rejected for the same reason as set forth in claims 7-9 above.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 10, 19, 28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

See the attached PTO-892.

9. **Any response to this action should be mailed to:**

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

(571) 273-8300 (for **formal** communications intended for entry)

Art Unit: 2618

(571)-273-7893 (for informal or **draft** communications).

Hand-delivered responses should be brought to Customer Service Window,
Randolph Building, 401 Dulany Street, Alexandria, VA 22314.

Any inquiry concerning this communication or communications from the examiner
should be directed to Duc M. Nguyen whose telephone number is (571) 272-7893,
Monday-Thursday (9:00 AM - 5:00 PM).

Or to Matthew Anderson (Supervisor) whose telephone number is (571) 272-
4177.

Duc M. Nguyen, P.E.

A handwritten signature in black ink, appearing to read 'Duc M. Nguyen', written over the printed name.
